University :

Universidad Internacional UNINTER

Interest :

Freelance, Full-time

English Level : Mid-Advanced

Hello, i am a front end developer specialized in the .NET Framework, but in addition to programming, I worry about managing good content and this has allowed me to learn in a self-taught way other areas of multimedial content such as: Photography , Motion Graphics, Filmaking, Audio Production and Graphic Design.

My main interests when developing a website, is that the image of this, transmit the identity and semblance of the company or person, and at the same time the content push the SEO of the site.

I consider myself as a person of parallel thinking, a lover of continuous learning and waiting for new experiences and challenges.

EXPERIENCE

Universidad Internacional UNINTER

• January 2014 - Current

• Contact Person: Israel Alejandro Navarro
Reyes (Director of Information Technologies,
Digital Marketing & Design)
